

Manual

Application of Colour Liquid Aquarell Bio-Pigment

The colour pigments, which are added to the Colour Liquid Prettau® Aquarell in order to easily visualise the application of liquid to the zirconia, may degrade over time (e.g. if stored in bright light). By adding Colour Liquid Aquarell Bio-Pigment, these colour pigments can be enhanced. The colours can be made as intensive as you like.

Colour assignment:

Colour Liquid Prettau® Aquarell	A1 – D4	Cervical A-D	Incisal Blue	Incisal Grey	Incisal Violet	Orange 1	Brown 2	Tissue A-C
Colour Liquid Aquarell Bio-Pigment	A1 – D4	Orange	Blue	Grey	Violet	Orange	Brown	Tissue

1 INITIAL SITUATION

The Colour Liquid Aquarell Bio-Pigment is used for enhancing the Colour Liquid Prettau® Aquarell and will burn out in the furnace. Make sure the colours are assigned correctly during the application!

2 PREPARE BIO-PIGMENT

Shake the Colour Liquid Aquarell Bio-Pigment well before using it.

3 OPEN

Open both bottles.

4 ADD BIO-PIGMENT

Add Colour Liquid Aquarell Bio-Pigment to Colour Liquid Prettau® Aquarell (1-2 drops Bio-Pigment per cm of liquids in the bottle). To achieve an even more intensive colour, some more Bio-Pigment can be added.

5 MIX

Shake the bottle with the Colour Liquid Prettau® Aquarell well to mix the liquids.

6 DYEING

The enhanced Colour Liquid Prettau® Aquarell can now be used!
