## Zirkonzahn.Download-Center Download instructions for Exocad® libraries

Version: 21/02/2019 – Page 3 of 3

The screenshot displays the Zirkonzahn Download-Center web application. On the left, a sidebar lists various implant systems for download. The main content area shows a list of available libraries, with the 'implant' folder selected. A 'Download files...' dialog box is open, showing the file structure of the selected folder. The dialog box has a 'Select location to store Library' field and a list of files and folders. The 'implant' folder is highlighted in the list, and its contents are visible below it. The dialog box has 'OK' and 'Cancel' buttons at the bottom right.

Select the folder „C:\DentalCADAppLibrary\implant\...“ as storage location.
