WONDERS OF NATURE

Teeth, formed by nature, appear in the most beautiful shapes.

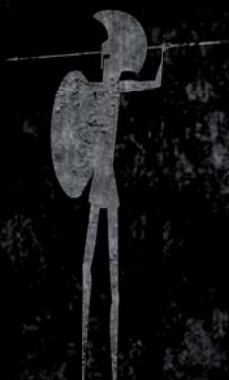

Among thousand models and with meticulous accuracy I've selected these 10 marvels, which I would now like to share with you.

We've made 10 books and we've implemented all teeth into the CAD/CAM software.

Junio Steyer

THE VIRTUAL AND INTELLIGENT TOOTH LIBRARY

- 10 natural and aesthetically pleasing tooth sets
- Fully anatomic or in 4 cut-back designs FIRE, WATER, AIR, EARTH for veneering with ceramics
- Aesthetic base for any kind of restoration: single crowns, small bridges, fully anatomic bridges (Prettau® Bridges), complete dentures
- Individual adjustments for any patient possible
- Combinable with the natural tooth substance, e.g. if only the occlusal surface of the tooth is abraded
- Different occlusal concepts can be realised, e.g. canine or posterior tooth guidance
- Suitable for treatment planning
